All dimensions in millimeters

**ANRIN SELF
PP Plastic Channels**

Whether steady rain, downpour or a sudden thaw: these classic drainage elements ensure that no puddles will block your path across the yard, to your garage or to your house. Galvanised slotted steel gratings or plastic

longitudinal-bar gratings are available for covering the channels.

| Fastening | TwistLock fastening | TwistLock fastening |
| Load capacity | Cl. A15 | Cl. A15 |
| Cover gratings | Slotted steel grating cl. A15, plastic grating cl. A15 | |

Installation instructions - ANRIN SELF PP Plastic Channels

Dig out the trench. Fill in and pre-condense the base course.

Connect pipe connections to the pipeline and align the components evenly. Fill concrete bed.

Form concrete bed, 3 parts sand + 1 part water + 1 part cement, on base course.

Place cover gratings on the channels.

Position channel string, sump unit and end cap on the concrete bed.

Install paving. The layer should end 2 to 5 mm higher than the cover grating.

- ✓ *Modern grating design made from black plastic or galvanised steel*
- ✓ *Permanently corrosion resistant*
- ✓ *High stability for flexible application*
- ✓ *T and corner connections possible*
- ✓ *Available in 3 installation heights*
